Registration Information

The seminar is open to physicians and other health professionals. Advance registration and payment are required in order to confirm your reservation. Registration is limited to seating capacity. **Registration ends on October 11 at 4 p.m.** Walk-in registrants will be accepted based on seating availability. Replacements/substitutes will be accepted with advance notice to The Research Foundation. On-site substitutes must have the original registrant's confirmation slip with them for admittance. Please use the registration form to register in advance. Please make checks payable to **The Research Foundation, 2316 E. Meyer Blvd., Kansas City, MO 64132.** There will be a \$25 processing fee for those requesting a refund. No cancellations with refunds allowed after **October 1, 2010.** For more information, please call The Research Foundation at 816-276-4218.

For the convenience of those attending, lunch and breaks are provided at no additional cost. As the temperature in the room may vary, it is advisable to bring a jacket to ensure your comfort during the sessions.

ADA Accommodation

Postgraduate Institute for Medicine, The Ed Bixby Institute for Postgraduate Medical Education at Research Medical Center and The Research Foundation comply with the Americans with Disabilities Act and will make reasonable accommodation. Registrants with disabilities requiring accommodation should advise The Research Foundation in advance of the seminar so we can address your needs.

DISCLOSURE OF CONFLICTS OF INTEREST

Postgraduate Institute for Medicine (PIM) requires instructors, planners, managers and other individuals who are in a position to control the content of this activity to disclose any real or apparent conflict of interest they may have as related to the content of this activity. All identified conflicts of interest are thoroughly vetted by PIM for fair balance.

EDUCATIONAL OBJECTIVES

At the conclusion of this activity, attendees should be able to:

- Describe the changing epidemiology of endocarditis in the US.
- Discuss the approach to management of device-related endocarditis.
- Review endocarditis treatment guidelines.
- Describe prevention strategies to attain the lowest possible infection rates.
- Discuss processes for Ambulatory Surgery Centers to meet the new CMS infection control rules.
- Review barriers to effective Infection Control programs and how to overcome them.
- Review the process of bacterial resistance and how it can be prevented.
- Discuss appropriate use of antibiotics for serious infections.
- Describe the role of newly released and upcoming antibiotics in clinical practice.
- Review current immunization guidelines.
- Discuss the merits of mandatory immunization of health care workers.
- Describe important new vaccines in the pipeline.
- Discuss effective protocols for early recognition of sepsis.
- Review appropriate antibiotic regimens for treatment of sepsis.
- Discuss the treatment of severe sepsis.
- Discuss the importance of strategies for early detection of HIV.
- Describe methods of preventing transmission of HIV infection.
- Review important complications of HIV treatment and their management.
